## ToV Principles

### **Institutional. Precise. Neutral. Credible.**

The Telcoin Association speaks like a governance body, not a startup, not a brand, not a community influencer.

### **What We Are**

A Swiss nonprofit governance association

**Legally and operationally distinct** from Telcoin (the company)

**A trusted source of record** for governance, updates, and ecosystem coordination

**Our voice must reinforce trust, not attention.**

### ToV Principle Three

## Integrity

Say only what is verified. No exaggeration. No speculation. No hype.

### ToV Principle Three

## Precision

Dates, numbers, names, and terminology must be exact. If something is uncertain, say so plainly.

### ToV Principle Three

## Neutral Authority

Professional, journalistic, fact-based. No opinions, emotions, or personal language.

### ToV Principle Three

## Community Awareness

Respect the community without sounding familiar. Warmth is allowed. Informality is not.

## How We Sound

**We are:**

**Clear, Calm, Objective,  
Confident without being promotional.**

**We are Not:**

Casual, Emotional, Sales-driven,  
Entertaining for its own sake.

**If it sounds like marketing copy, it's wrong.**

# Language Rules (Non-Negotiable)

American English

Proper grammar and punctuation

“Telcoin Wallet”, not “Telcoin App”

No ALL CAPS

No slang, memes, or internet language

Avoid contractions in formal updates

Oxford comma

Prefer commas or en dashes ( - ), never em dashes ( — )

“Telcoin Association”, not “Telcoin”

## Emojis

- **Never in governance**, regulatory, or financial updates
- **Max 1-2** in community or congratulatory posts
- **Never at the beginning** of a post
- **Always neutral** (👏✅🎉), yellow skin tone only

## Hashtags

- **Never** in the body text
- **At the end only**, max 1-2, event-related only

## Mentions (@)

- **Do not** tag our own accounts
- Tag partners only when appropriate and beneficial

# Content by Context

## Governance & Council Updates

**Tone:** Strictly Institutional | No emojis. No enthusiasm. No adjectives. | Reads like an official report.

## Announcements & Milestones

**Tone:** Proud, Controlled | Positive but restrained. | Never “excited”, “thrilled”, or “game-changing”.

## Platform & Ecosystem Updates

**Tone:** Informative, Factual | Describe what changed, why it matters, what’s next.

## Community & Third-Party Wins

**Tone:** Respectful Recognition | Formal congratulations, minimal warmth allowed.

## Calls to Action (CTAs)

CTAS MUST BE:

**Clear**

“Read the full update here”

**Polite**

“Review the proposal and participate in the vote”

**Non-promotional**

“Learn more on our website”

---

**Never Use:** “Don’t miss out”, “Act now”, Sales-style urgency

# Fast Self-Check Before Publishing

**Ask yourself:**

- 1 . Would this sound appropriate in a regulatory newsletter?
- 2 . Does every claim rely on verifiable facts?
- 3 . Could this be misread as promotional or speculative?
- 4 . Does this clearly distinguish Telcoin Association from Telcoin?

**If any answer is “no”, rewrite.**

## Final Rule

The Telcoin Association  
does not chase engagement.  
**It earns credibility.**

---

Every word should reinforce that.

Logo Placement

## Logo Usage

The logo can be displayed on various backgrounds, as shown, and should be used on light or dark backgrounds accordingly.

The logo should not be placed on complex backgrounds that interfere with its construction or reduce its legibility.

Logo Design  
Logo Usage  
**Logo Placement**

## Logo Placement

The horizontal logo (the official version) is typically placed in the top-left corner, positioned one mark height from the top and one and a half mark widths from the left edge.

This placement is used in cases such as social media templates or digital materials that allow this type of layout. It may not always apply to printed materials or other formats.

## Brand Construction

Tone of Voice  
Logo Design  
Logo Usage  
Logo Placement

## Co-Branding Placement

In all co-branding situations, the Telcoin Association logo must always appear first. Two display formats are permitted: horizontal and vertical. In both cases, spacing between the logos is defined by an equal-space rule, represented by the letter "X" or a divider bar.

This spacing must remain consistent, with the X or bar positioned at an equal distance from each logo.

Alignment is based on the footprint of the logotype, ensuring visual balance and consistency across applications. No logo should dominate or disrupt this spacing rule.

# Graphic Elements

# 02

## Graphic Elements

### Color Palette

Typography  
Photography  
Visual Elements  
Iconography

## Color Palette

The Telcoin palette combines confident blues and clean neutrals to convey trust, innovation, and credibility.

Core blues anchor the brand with stability, while brighter blues highlight key actions.

Dark shades add depth, and soft blues with white bring openness, creating a clear, modern, and instantly recognizable visual hierarchy.

## Gradients

### TEL Light Gradient:

Built from Telcoin Association's core palette, this gradient reflects clarity, accessibility, and innovation. Its shift from light to deep blues adds depth while keeping a modern, clean feel, ideal for digital interfaces, presentations, and materials emphasizing approachability and transparency.

### TEL Dark Gradient:

Using deeper tones from the Telcoin Association's palette, this gradient conveys trust, stability, and professionalism. Perfect for backgrounds, hero sections, and formal materials, it reinforces brand confidence and complements the light gradient with contrast and gravitas.

## Primary Type

New Hero is a modern, geometric sans-serif font that combines clarity with strength. Its clean lines and balanced proportions convey professionalism and approachability, making it ideal for both digital interfaces and print materials.

The font's versatility from Regular to Bold weights allows the brand to express hierarchy, emphasis, and a dynamic, forward-looking identity.

Its use across headlines, body text, and UI elements reinforces Telcoin Association's image as secure, innovative, and accessible.

## Photography

Telcoin Association's visuals blend futuristic technology with human connection. Photography and graphics emphasize digital innovation, data-driven ecosystems, and collaboration. Glowing blues, dynamic light effects, and geometric shapes create contrast and cohesion.

Visuals range from abstract digital landscapes to human-focused imagery, highlighting the intersection of people and technology. Consistent design elements make the brand instantly recognizable, modern, and approachable.

## Visual Elements/ Social Media Templates

The social media templates reflect the brand, often featuring a hexagon element and left-aligned logo. Available in light and dark styles, visuals on dark backgrounds are bright and stylized for contrast.

A glass effect highlights text over busy images, keeping content clear and striking. Consistent design elements ensure posts are instantly recognizable and cohesive.

**Iconography**

## Iconography

The Iconography section of a brand book outlines the use of symbols and icons that represent the brand. This section is important to ensure that the symbols and icons used are consistent and recognizable across different media and contexts.

### Created in Figma, Made for Figma!

All icons respect Figma's component overrides like stroke and color changes. Crafted pixel precise with a 2px stroke and neatly organized in variants.
